PAR-Q PHYSICAL ACTIVITY READINESS QUESTIONNAIRE

For most people, physical activity should not pose any problem or hazard. Par-Q has been designed by Health Canada to identify the small number of adults for whom physical activity might be inappropriate or those who should have medical advice concerning the type of physical activity most suitable for them.

Common sense is your best guide in answering these few questions. Please read them carefully and check the yes or no opposite the question if it applies to you.

Yes	No	Question
		Has your doctor ever said you have heart trouble?
		Do you frequently have pains in your heart and chest?
		Do you often feel faint or have spells of severe dizziness?
		Has your doctor ever said your blood pressure was too high?
		Has your doctor ever told you that you have a bone or joint problem such as arthritis that has been aggravated by exercise or might be made worse with exercise?
		Is there a good physical reason not mentioned here why you should not follow an activity program even if you wanted to?
		Are you over the age of 65 and not accustomed to exercise?

If you answered yes to one or more questions....

If you have not recently done so, consult with your physician by telephone or in person **before** increasing your physical activity.

If you answered no to all questions.....

If you answered Par-Q accurately, you have reasonable assurance of your suitability for exercise.

Informed use of the Par-Q: The Dorset Recreation Centre and their agents assume no liability for persons who undertake physical activity, and if in doubt after completing this questionnaire, consult your physician **prior** to physical activity.
